our environment for today
and future generations.*

BIO Series

BIO Series

Biological Recycle/Clarifier Systems

A CLARIFIER ALLOWS FOR GREATER SETTLING AND REMOVAL OF ACCUMULATED SOLIDS IN WASTEWATER BEFORE TREATMENT. THIS PRETREATMENT MAKES IT EASIER FOR WATER TREATMENT SYSTEMS TO OPERATE EFFECTIVELY.

BIO-15-0M10 shown with ozone option, WX-0020

FEATURES

- Cone-shaped tank
- Quality recycled wash water without common odor problems
- Easy operation and maintenance
- 1.0 HP sump pump
- Heavy-duty, corrosive-resistant and UV-resistant poly-skid
- Peristaltic pump is self-priming
- Mazzei® venturi air injection system

APPLICATIONS

- Golf Courses – Designed to handle equipment wash water for various golf course configurations
- Solid-Waste Haulers – Able to effectively treat vehicle wash water, like that from garbage trucks
- Food Processing Plants – Pretreatment of a broad range of food processing wastewater before discharging
- Petro-Chemical – Capable of treating waste streams containing multiple, organic particulate matter
- Anything with organic compounds in wastewater

Peristaltic pump is self priming for passive automatic liquid microbe injection

Mazzei® venturi air injection system sustains beneficial aerobic microbes while preventing bacteria from turning odorous and anaerobic

ETL listed NEMA-4 rated corrosion-proof control panel for safe and reliable operation

| MODEL NUMBER | FLOW RATE | CLARIFIER TANK | MEDIA | SUMP PUMP (INCLUDED) | TRANSFER PUMP | POWER REQUIREMENTS | DIMENSIONS (LxWxH) | SHIP WT. |
|--------------|-----------|----------------|---------------|----------------------|---------------|--------------------|--------------------|----------|
| BIO-15-0M10* | 0-15 GPM | 600 gallons | 1,300 sq. ft. | 1.0 HP | 3/4 HP | 230V, 10, 20.0A | 5x8x9.16ft. | 1250 lb. |
| BIO-15-0M30* | 0-15 GPM | 600 gallons | 1,300 sq. ft. | 1.0 HP | 1/2 HP | 230V, 30, 15.0A | 5x8x9.16ft. | 1250 lb. |

*Includes sump pump and peristaltic pump.
230/208/460V 3Ø available on all models as options.

ACCESSORIES:

| PART NUMBER | DESCRIPTION | FITS MODELS |
|--------------|---|---------------|
| 55-0033 | Air fine-bubble injector, 1½-inch – Mazzei used for aeration | BIO-15 models |
| 55-1887 | Check valve, 2-inch – Holds prime in suction line | BIO-15 models |
| 855-0017 | Sludge box – Plastic box designed to hold the sludge bags; includes a 10-foot x 2-inch diameter PVC hose | BIO-15 models |
| RC-0003-0002 | Biodegradable sludge bags – Designed to capture the sludge while allowing the water to flow through, 5 qty. | BIO-15 models |
| RC-0016-0001 | Replacement media, 600-gallons – Replacement coalescing media | BIO-15 models |
| RC-0016-0002 | Replacement high solids media, 600-gallons – Replacement coalescing media | BIO-15 models |

OPTIONS:

| PART NUMBER | DESCRIPTION | FITS MODELS |
|-------------|--|----------------------------|
| WX-0014 | Pinch valve assembly – Pinch valve, bladder style (used on cone bottom tanks), 2-inch, 230V, 1Ø | BIO models |
| WX-0020 | Ozone – For specialized applications where sterilization of the waste stream is desired | BIO-15-0M10 |
| WX-0024 | Recirculation option for floats – If used along with the #WX-0042, product tank overflow, water will recirculate from product tank back to pit | BIO-15-0M10 |
| WX-0030 | BIO sump pump conversion – Customized option, converts surface-mount sump pump to submersible sump pump, 230V, 1Ø | BIO-15-0M10 |
| WX-0041 | 165-gallon water tank upgrade – For when a larger volume of usable water is needed | BIO-15 models |
| WX-0042 | Product tank overflow – Allows water to cycle back to collection pit | BIO-15 models |
| WX-0043 | 460V, 3Ø – Upgrades 230V model to operate at 460V, 3Ø | BIO-15 models |
| WX-0044 | Ozone – For specialized applications where sterilization of the waste stream is desired | BIO-15 208/230V, 3Ø models |
| WX-0045 | Ozone – For specialized applications where sterilization of the waste stream is desired | BIO-15 460V, 3Ø models |
| WX-0101 | BIO sump pump conversion – Customized option, converts surface-mount sump pump to submersible sump pump, 230V, 1Ø | BIO-15-0M30 |
| WX-0119 | High solids media – Allows for debris to travel easily through media with vertical design | BIO-15 models |
| WX-0128 | Hour meter – Displays the number of hours unit has been in operation | BIO-15 models |

BIO Series

Biological Recycle/Discharge Systems

THE POPULAR BIO SERIES SYSTEM UTILIZES FIXED-FILM BACTERIA IN CONJUNCTION WITH COALESCING MEDIA TO TREAT WASTEWATER. OXYGEN IS ADDED TO THE BACTERIA IN THE WASTE STREAM BY A VENTURI INJECTION SYSTEM.

BIO-20R-0M11

Hose connectors are designed for easy accessibility and quick installation

Mazzei® venturi air injection system, 55-0126, sustains beneficial aerobic microbes while preventing bacteria from turning odorous and anaerobic

Pressure manifold set-up is standard on BIO-20R-0M11

Durable "True Union" valve

ETL listed NEMA-4 rated corrosion-proof control panel for safe and reliable operation

Slope bottom tanks are standard on all BIO-20, BIO-25 and BIO-35 models

Aeration pump, 3-0397

Transfer pump, 3-0399

BIO Series

Biological Recycle/Discharge Systems

FEATURES

- Bioreaction tank
- Biofilm generative media
- Aeration system
- Pressurized tank
- Pressure manifold
- Submersible sump pump
- Marine aluminum construction with slope bottomed design

BENEFITS

- Low maintenance
- Low operating costs
- Simple equipment operation

BIO-25R shown with optional waterfall filter, RC-0008-0002, towable grass cart, RC-0004-0002 and peristaltic pump assembly, RC-0021-0001

D = Discharge / R = Recycle

230V/208V/460V 3Ø available on all models as options.

BIO Series Accessories

Submersible sump pump, 3-0216

Replacement sump pump, 3-0460

Towable grass cart, RC-0004-0002

Aluminum round sump pit, 56-0069 and aluminum sump grating, 56-0070

Peristaltic pump assembly, RC-0021-0001

ACCESSORIES:

| PART NUMBER | DESCRIPTION | FITS MODELS |
|--------------|--|--------------------------------|
| 19-0216 | 20-inch, replacement 20-micron pleated filter – Removes sediment | All BIO models |
| 21-0153 | Wall-mount bracket – Used to mount #RC-0008-0002, waterfall filter, to wall | BIO-20, BIO-25 & BIO-35 models |
| 21-0213 | Tank-mount bracket – Used to mount #RC-0008-0002, waterfall filter, to BIO-tank, stainless-steel, for aluminum tanks | BIO-20, BIO-25 & BIO-35 models |
| 3-0216 | Submersible sump pump – Stainless-steel replacement, 1/2 HP, 230V, 1Ø, 5.0A | BIO-20, BIO-25 & BIO-35 models |
| 3-0397 | Aeration pump – 1.5 HP, 115V/230V, 1Ø | BIO-25 & BIO-35 models |
| 3-0398 | Aeration pump – 1.5 HP, 208-230V/460V, 3Ø | BIO-25 & BIO-35 models |
| 3-0399 | Transfer pump – 2.0 HP, 115V/230V, 1Ø | BIO-25 & BIO-35 models |
| 3-0400 | Transfer pump – 2.0 HP, 208-230V/460V, 3Ø | BIO-25 & BIO-35 models |
| 3-0401 | Transfer pump – 1.5 HP, 115V/230V, 1Ø | All BIO models |
| 3-0402 | Transfer pump – 1.5 HP, 208-230V/460V, 3Ø | All BIO models |
| 3-0460 | Replacement sump pump – Surface-mount, 1.0 HP, 230V, 8.0A | All BIO models |
| 32-0918 | Buck booster – Adjusts voltage on equipment, mounted on unit | All BIO models |
| 33-0661 | Trap and basket – Used on #3-0460, replacement sump pump | All BIO models |
| 55-0068 | Mazzei injector, 2-inch – Used for aeration | BIO-20, BIO-25 & BIO-35 models |
| 55-0126 | Mazzei venturi air injection system, 2-inch – Check valve | All BIO models |
| 56-0069 | Aluminum round sump pit – Lightweight aluminum design; 4-inch NPT inlet; 2-inch x 2-inch NPT and 1-inch x ¾-inch NPT outlets; 52-gallon capacity | Consult dealer |
| 56-0070 | Aluminum sump grating – Lightweight aluminum cover for #56-0069, aluminum round sump pit | Consult dealer |
| 855-0062 | Replacement peristaltic metering pump – For replacement of an existing pump in the field; includes wall mount plug | All BIO models |
| RC-0004-0001 | Grass cart – Grass from #RC-0008-0002, waterfall filter, is collected and de-watered and can be easily transported for disposal | All BIO models |
| RC-0004-0002 | Towable grass cart – Grass from #RC-0008-0002, waterfall filter, is collected and de-watered and can be easily transported for disposal | All BIO models |
| RC-0008-0002 | Waterfall filter – Water flows from the system while grass and debris are separated and dropped into the grass cart, marine aluminum | All BIO models |
| RC-0009-0001 | Single filter housing – Filter before pressure washer, includes single filter housing, mounting bracket and filter wrench, Fits 1 - 20-inch filter (not included), #19-0216, 20-micron filter is recommended | All BIO models |
| RC-0021-0001 | Peristaltic pump assembly – Single metering pump wired into BIO unit, control box for automatic liquid microbe injection | All BIO models |
| RC-0021-0002 | Dual peristaltic pump assembly – Two metering pumps in one set-up for dual liquid injection | All BIO models |
| RC-0021-0120 | Plug-in single peristaltic pump assembly – Single metering pump with 120V plug and 54-inch power cord for liquid microbe injection. Ideal for injections into pits and tank. Requires outlet. | All BIO models |

BIO Series

Accessories & Options

WATERFALL FILTER, RC-0008-0002

DESIGNED TO SEPARATE GRASS CLIPPINGS, LEAVES AND OTHER VEGETATION FROM WASTEWATER.

APPLICATIONS

- Golf courses
- Equipment wash pads
- Municipalities
- Rental yards

The grass clippings and water are pumped from wash catch pits to the waterfall filter. The filter is equipped with a wedge wire screen that separates the grass and debris and drops it into a grass cart below while the filtered water is directed to the biological water treatment system for further treatment.

| PART NUMBER | MATERIAL OF CONSTRUCTION | WIRE SCREEN | DIMENSIONS (LxWxH) | SHIP WT. |
|--------------|--------------------------|---|--------------------|----------|
| RC-0008-0002 | Marine aluminum | 304L stainless-steel, rated to 40-45 mesh | 36x20.5x25in. | 100 lb. |

pH CONTROL SYSTEM

WX-0037 230V

WX-0102 120V

A desired pH set point is selected by the user and a pH adjustment chemical is metered into the wastewater by a peristaltic pump. The pH set point is achieved by either lowering or raising the pH level.

DUAL CONTROL pH CONTROL SYSTEM

WX-0134 230V

WX-0135 120V

The dual control pH control system has two set points where pH can be adjusted either up or down.

BIO Series

Options

High solids media,
WX-0121

Epoxy-lined tank, WX-0124

OPTIONS:

| PART NUMBER | DESCRIPTION | FITS MODELS |
|-------------|--|---|
| WX-0005 | Ozone – For specialized applications where sterilization of the waste stream is desired, 230V, 1Ø | BIO-25R-0M10 |
| WX-0014 | Pinch valve assembly – Pinch valve, bladder style (used on cone bottom tanks), 2-inch, 230V, 1Ø | All BIO models |
| WX-0015 | Ozone – For specialized applications where sterilization of the waste stream is desired, 230V, 1Ø | BIO-35R-0M10 |
| WX-0029 | 550-gallon product tank expansion – For when larger volume of usable water is needed | All BIO models |
| WX-0037 | pH control system, 230V – For when pH adjustment is needed | All BIO models |
| WX-0039 | Pinch valve assembly – Pinch valve, bladder style (used on cone bottom tanks), 2-inch, 120V, 1Ø | All BIO models |
| WX-0040 | Ozone – For specialized applications where sterilization of the waste stream is desired, 230V, 1Ø | BIO-20D-0M10 & BIO-20R-0M10 |
| WX-0046 | 460V – Changes 230V model to 460V, 3Ø | BIO-20D-0M30 |
| WX-0047 | Ozone – For specialized applications where sterilization of the waste stream is desired, 208-230V, 3Ø | BIO-20D-0M30 & BIO-20R-0M30 |
| WX-0048 | Ozone – For specialized applications where sterilization of the waste stream is desired, 460V, 3Ø | BIO-20D-0M30 & BIO-20R-0M30 |
| WX-0049 | 460V – Changes 230V model to 460V, 3Ø | BIO-20R-0M31, BIO-25R-0M30 & BIO-35R-0M30 |
| WX-0050 | Ozone – For specialized applications where sterilization of the waste stream is desired, 208-230V, 3Ø | BIO-25R-0M30 |
| WX-0051 | Ozone – For specialized applications where sterilization of the waste stream is desired, 460V, 3Ø | BIO-25R-0M30 |
| WX-0052 | Ozone – For specialized applications where sterilization of the waste stream is desired, 208-230V, 3Ø | BIO-35R-0M30 |
| WX-0053 | Ozone – For specialized applications where sterilization of the waste stream is desired, 460V, 3Ø | BIO-35R-0M30 |
| WX-0089 | Ozone – For specialized applications where sterilization of the waste stream is desired, 230V, 1Ø | BIO-20R-0M11 |
| WX-0090 | Ozone – For specialized applications where sterilization of the waste stream is desired, 208-230V, 3Ø | BIO-20R-0M31 |
| WX-0091 | Ozone – For specialized applications where sterilization of the waste stream is desired, 460V, 3Ø | BIO-20R-0M31 |
| WX-0100 | BIO sump pump conversion – Customized option, converts submersible pump to surface-mount sump pump | BIO-20R, BIO-25R & BIO-35R models |
| WX-0102 | pH control system, 120V – For when pH adjustment is needed | All BIO models |
| WX-0120 | High solids media – Allows for debris to travel easily through media with vertical design | BIO-20 models |
| WX-0121 | High solids media – Allows for debris to travel easily through media with vertical design | BIO-25 models |
| WX-0122 | High solids media – Allows for debris to travel easily through media with vertical design | BIO-35 models |
| WX-0124 | Epoxy-lined tank – High solid polyamide epoxy-lined tank is chemical and corrosion-resistant | BIO-20D models |
| WX-0125 | Epoxy-lined tank – High solid polyamide epoxy-lined tank is chemical and corrosion-resistant | BIO-20R models |
| WX-0126 | Epoxy-lined tank – High solid polyamide epoxy-lined tank is chemical and corrosion-resistant | BIO-25R models |
| WX-0127 | Epoxy-lined tank – High solid polyamide epoxy-lined tank is chemical and corrosion-resistant | BIO-35R models |
| WX-0128 | Hour meter – Displays the number of hours unit has been in operation | All BIO models |
| WX-0133 | Coagulation system – Used in heavy solids applications to help dirt and solids settle for easy removal | All BIO models |
| WX-0134 | Dual pH control, 230V – Two set points where pH can be adjusted | All BIO models |
| WX-0135 | Dual pH control, 120V – Two set points where pH can be adjusted | All BIO models |
| WX-0136 | Heater, 230V – Promotes heat for microbes, powered from main box, additional 20A required | BIO-20R, BIO-25R & BIO-35R models |
| WX-0137 | Heater, 460V – Promotes heat for microbes, powered from main box, additional 20A required | BIO-20R, BIO-25R & BIO-35R models |
| WX-0138 | Heater, 230V – Promotes heat for microbes, powered from main box, additional 20A required | BIO-20 models without front deck |
| WX-0139 | Heater, 460V – Promotes heat for microbes, powered from main box, additional 20A required | BIO-20 models without front deck |
| WX-0142 | 250-gallon auxiliary poly tank – Allows you to treat the BIO water with ozone in a separate poly tank | All BIO models |

Ozone is only available with an epoxy-lined tank, WX-0124-WX-0127 or with poly tank option, WX-0142.

BIO Series

System Set-Up and Epoxy-Lined Tanks

Epoxy-lined tank, see options page 8

BIO Series

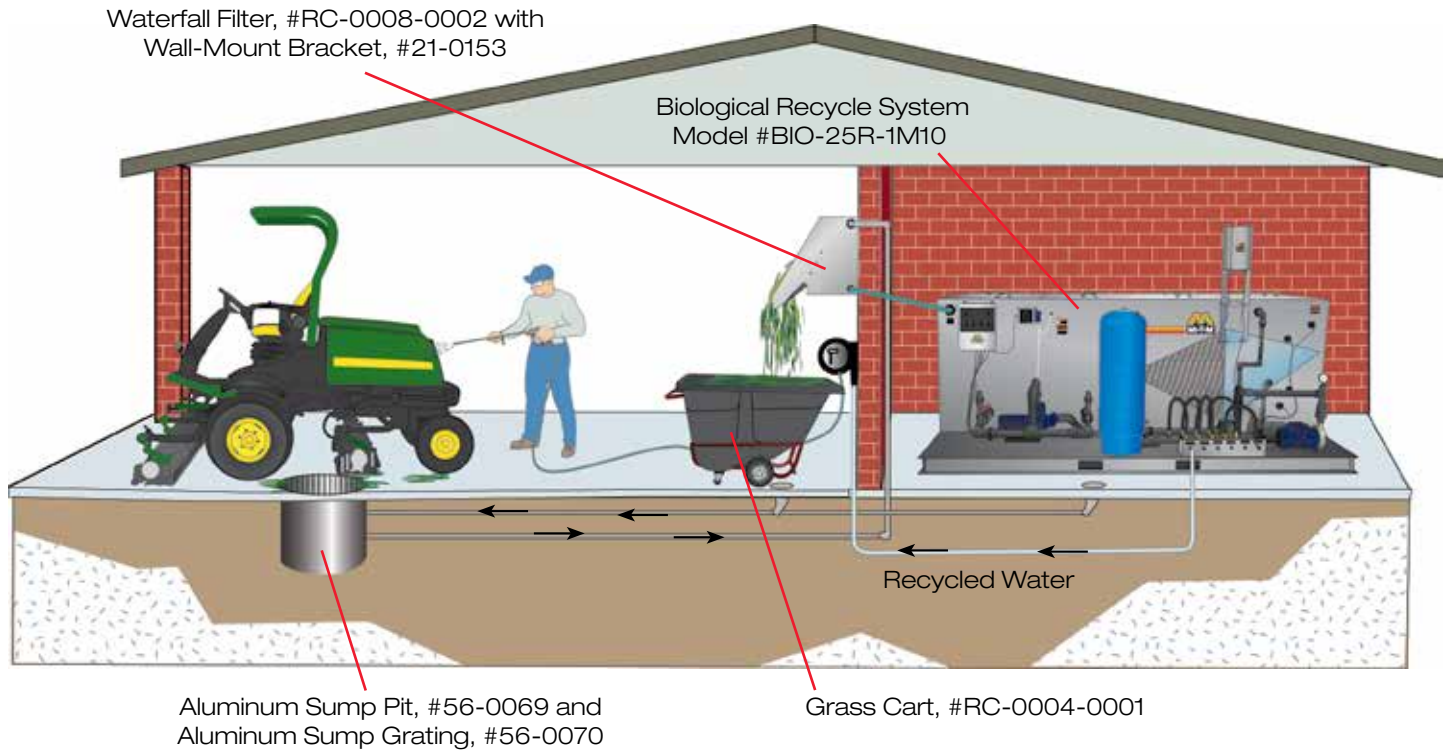

Process & Flow Description

1. **SUBMERSIBLE SUMP PUMP** – Untreated wash water is introduced into the BIO system by a 1/2 HP submersible sump pump.
2. **WATERFALL FILTER** (Accessory #RC-0008-0002) – Especially useful in golf course applications, water is typically pumped into a marine aluminum waterfall filter for effective grass and particle separation. Water flows into the system while grass and debris are separated and dropped into the grass cart.
3. **GRASS CART** (Accessory #RC-0004-0001) – Grass from the waterfall filter is collected in the grass cart. Grass is de-watered through a specially designed stainless-steel screen in the grass cart that allows the cart to be filled with grass and debris without clogging the screen. Water drains back to the pit and the grass can easily be transported for disposal.
4. **BIOREACTION TANK** – Untreated wastewater is pumped in the first chamber of the stainless-steel tank, where solids are precipitated and the microbes begin their work. The tank has up to 2,244 gallons of holding capacity to provide maximum treatment time for the biological microbes.
5. **BIOFILM GENERATIVE MEDIA** – The bioreaction portion of the system houses literally thousands of square feet of biological media surface area where the microbe growth is maximized. Water flows through the media and around a series of baffles, changing direction countless times and maximizing contact with "hungry" microbes. The microbes then treat the water by consuming a broad range of organic constituents (such as herbicides, pesticides, oils, grease, etc.) turning them into carbon dioxide and water. To ensure proper and continued colonization, microbes are added periodically - a process called inoculation.
6. **AERATION SYSTEM** – A unique aeration system injects large amounts of oxygen into the wastewater. Generating dissolved oxygen is critical for maximizing the health and activity level of microbes and the size of the colony.
7. **OZONE (OPTION)** – An ozone generator is an option for specialized applications where sterilization of the waste stream is desired. (Ozone injection is not available for aluminum tank systems)
8. **PRESSURIZED TANK** – Once water is biologically treated, a pressurized tank and pump deliver up to 35.0-GPM of recycled water to three outlet ports.
9. **PERISTALTIC PUMP** (Option) – Self-priming for passive automatic liquid microbe injection.
10. **SLOPED BOTTOM TANKS** – Makes regular scheduled maintenance easier.

BIO Series

Sample Equipment Wash Pad Application

RECOMMENDED APPLICATIONS:

- Rental Yards
- Golf Courses
- Heavy Equipment Dealers
- Trucking Facilities
- Military Bases
- Truck Rental Fleets
- Diesel Repair Facilities
- Forklift Washing Operations
- Aircraft Maintenance and Restoration
- Shipyards
- Municipalities/State DOTs
- Oil Fields
- Engine Rebuilders and Manufacturers

THE IMPORTANCE OF A PROPER PIT SYSTEM:

Once equipment is washed, the untreated wash water flows into your pit system. A proper pit system for your application is the first step in proper wash water treatment and a critical element in any wash water recycle system.

Consult your dealer to determine the pit system configuration that works best for your application.

THE RIGHT TOUCH

Our stainless-steel tanks go through a passivation process after the welding phase of production. This ensures a quality product with low maintenance.

Before

After

Fiberglass Pits & Consumables

IN-GROUND FIBERGLASS PIT SYSTEMS

3' x 9' PIT SYSTEMS

| PART NUMBER | PIT SIZE (FT.) | DESCRIPTION | SHIP WT. |
|---------------|----------------|--|----------|
| 12-0074 | 3x9x4.5 | 3-stage collection pit, fiberglass, 600-gallon capacity | 480 lb. |
| 12-0223 | 3x9x4.5 | 3-foot x 9-foot baffleless pit, fiberglass, 600-gallon capacity | 480 lb. |
| 20-1505A18 | Fits 3x9 | Pit liner assembly, painted; 2 qty. are required | 45 lb. |
| 56-0032 | Fits 3x9 | Aluminum hinged diamond plate cover with 3 frame sections | 100 lb. |
| RC-0001-0003 | Fits 3x9 | Brace kit for installation of 3-stage collection pit | 200 lb. |
| RC-0018-0001* | Fits 3x9 | Steel grating for pit; 3,060 lb./ft. ² uniform load rating | 546 lb. |
| RC-0018-0002* | Fits 3x9 | Steel grating for pit with steel cover; 3,060 lb./ft. ² uniform load rating | 680 lb. |

*May combine RC-0018-0001 and RC-0018-0002 to have both open and closed sections for the 3' x 9' pits. Consult factory for more information.

3' x 3' PIT SYSTEM

| PART NUMBER | PIT SIZE (FT.) | DESCRIPTION | SHIP WT. |
|--------------|----------------|--|----------|
| 12-0071 | 3x3x4.5 | Catch basin, fiberglass, 100-gallon capacity | 190 lb. |
| 20-0480A18 | Fits 3x3 | Steel grating for pit, 2 sections; 6,250 lb./ft. ² uniform load rating, H-20 load rated | 250 lb. |
| 20-1533A18 | Fits 3x3 | Pit liner assembly, painted | 26 lb. |
| 56-0031 | Fits 3x3 | Aluminum diamond plate cover and frame | 30 lb. |
| RC-0001-0002 | Fits 3x3 | Brace kit for installation of 3-foot x 3-foot pit | 150 lb. |

2' x 2' PIT SYSTEM

| PART NUMBER | PIT SIZE (FT.) | DESCRIPTION | SHIP WT. |
|--------------|----------------|--|----------|
| 12-0073 | 2x2x3 | Sump pit, fiberglass, 50-gallon capacity | 92 lb. |
| 20-0479A18 | Fits 2x2 | Steel grating for pit; 6,660 lb./ft. ² uniform load rating, H-20 load rated | 100 lb. |
| 56-0030 | Fits 2x2 | Aluminum diamond plate cover and frame | 60 lb. |
| RC-0001-0001 | Fits 2x2 | Brace kit for installation of 2-foot x 2-foot pit | 75 lb. |

Additional product information available in the Pit Systems Brochure.

3-stage collection pit

CONSUMABLES

| PART NUMBER | DESCRIPTION | CFU COUNT |
|--------------|---|-----------------------|
| AW-0058-0020 | Liquid concentrate hydrocarbon bacteria – Use with peristaltic pump, 5-gallons | 54 Million CFU/ml |
| AW-0058-0021 | Surface prep liquid microbes – For concrete and parts cleaning, removes hydrocarbons, 5-gallons | 67 Million CFU/ml |
| RC-2014-0002 | Hydrocarbon microbes – 2 lb. solid cube, lasts approximately 2-3 months | 4 Billion CFU/gm |
| RC-2017-0001 | Hydrocarbon microbes – Tablet, lasts approximately 15-30 days | 4 Billion CFU/gm |
| RC-2001-0001 | Hydrocarbons/VOCs mix – Microbes, monthly inoculation | 2.27 Trillion CFU/lb. |
| RC-2002-0001 | Golf course mix – Microbes, monthly inoculation | 2.27 Trillion CFU/lb. |
