Residential | Commercial Products Guide

Pressure Washers | Portable Generators | Air Compressors
At Mi-T-M our goal is to continue to build the best equipment made right here in America’s heartland, where workers take pride in their everyday job of manufacturing pressure washers, air compressors, generators and the multitude of other equipment with the familiar black and gold logo. But this logo is more than a name. It means quality and craftsmanship. It stands for pride in what we do. Proud that what we do matters to the hard working men and women in our industry.

Nearly every day, we take our places at the Peosta, Iowa facility next to 450 of our coworkers who come to do their best work. Striving for that quality, that standard we hold ourselves to. After all, this is Mi-T-M. Our reputation and our customers depend on it.
Selecting The Right Pressure Washer For Your Needs
What you should know:

<table>
<thead>
<tr>
<th>PSI</th>
<th>GPM</th>
<th>PSI vs. GPM</th>
<th>CU</th>
</tr>
</thead>
<tbody>
<tr>
<td>pounds per square inch</td>
<td>gallons per minute</td>
<td>PSI and GPM are both equally important when choosing a pressure washer. The PSI indicates the amount of pressure and GPM indicates the flow. You must have the correct combination of PSI and GPM to have the most ideal pressure washing system for your needs.</td>
<td>cleaning unit</td>
</tr>
<tr>
<td>Indicates the amount of pressure the unit will create if concentrated on one square inch of surface area. The greater the PSI, the better the cleaning efficiency.</td>
<td>How much water (gallons) will flow through your pressure washer (flow rate). A higher flow rate will cut down on your cleaning time.</td>
<td>This is calculated by multiplying PSI by GPM. The number is useful for comparing models. The higher the number of cleaning units, the more cleaning power your pressure washer has.</td>
<td></td>
</tr>
</tbody>
</table>

Engines
Mi-T-M chooses engines that are user-friendly, low maintenance and provide powerful performance for all your homeowner and contractor applications.
Quick Connect High Pressure Nozzles

Quick connect high pressure nozzles allow you to easily switch nozzles when you quickly change applications. Mi-T-M nozzles have unique pressure and flow settings that are optimized for each project type.

<table>
<thead>
<tr>
<th>Nozzle Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>0° Cutting Nozzle</td>
<td>Provides a maximum concentrated pressure for heavy-duty cleaning that can gouge or cut into surfaces. Can remove stubborn stains on concrete and other surfaces.</td>
</tr>
<tr>
<td>15° Chiseling Nozzle</td>
<td>With its 15° angle this nozzle cleans concrete and asphalt by scraping paint, grease and grime from their hard surfaces.</td>
</tr>
<tr>
<td>25° Flushing Nozzle</td>
<td>This medium spray angle is most commonly used to clean dirt from siding, sidewalks and hardwoods.</td>
</tr>
<tr>
<td>40° Wash Nozzle</td>
<td>This high-flow/low-pressure nozzle is great to clean most surfaces safely. Perfect for siding, windows and vehicles.</td>
</tr>
<tr>
<td>Low-Pressure Detergent Nozzle</td>
<td>The low pressure detergent nozzle is used to apply cleaning detergents.</td>
</tr>
</tbody>
</table>
How To Use A Pressure Washer

1. Start cleaning with a wide spray pattern and move closer until the desired effect is achieved.

2. Keep the nozzle in motion, spraying at a steady speed with long, even strokes to ensure uniform results.

3. Maintain a consistent distance between the nozzle and the cleaning surface.

4. When cleaning heavily soiled or stained surfaces, use cleaning detergents formulated for pressure washers. Be sure to NEVER use caustic cleaning agents.

5. Consider using brush attachments or a rotating nozzle to help remove stubborn dirt, grime and stains.

6. To prevent streaks on vertical surfaces, such as fencing and house siding, always begin pressure washing or applying detergent at the bottom of the surface, then work upward.

7. When rinsing vertical surfaces, start at the top and work downward. Gravity will help the clean water flush away dirt, debris and detergent residue, in addition to preventing streaking.

Pump:
- Aluminum manifold
- Thermal relief valve
- In-line water strainer
- Built-in low pressure detergent injector

Frame:
- Removable powder coated steel 1¾-inch tube handle
- Welded frame reinforcement
- Large 12-inch semi-pneumatic tires

Unit Includes:
- Quick connect nozzles - 15°, 25° and detergent nozzle
- Detergent tank (Not available on CV-2600-3MMC)
- 30-foot x ¼-inch nylon-braded high pressure hose
- Professional-grade trigger gun
- Two-piece, 36-inch lance

Limited Warranties:
- 1 year AR pump
- 1 year Mi-T-M engine
- Honda engine: 3 month, commercial / 2 year, residential
## ChoreMaster® Series
Gasoline – Direct Drive – Horizontal

Clean dirt and grime from home exteriors, outdoor equipment and just about any surface with the handy CM Horizontal Series. It’s a great choice for both homeowners and small business owners.

### Pump:
Equipped with the Mi-T-M Pressure Relief Start which eliminates pressure build-up in the system ▪ Forged brass manifold ▪ Thermal relief valve ▪ In-line water strainer ▪ Built-in low pressure detergent injector

### Frame:
Removable powder coated steel 1 1/4-inch tube handle ▪ Welded frame reinforcement ▪ Large 12-inch semi-pneumatic tires

### Unit Includes:
Quick connect nozzles - 15°, 25° and detergent nozzle ▪ Detergent tank ▪ 30-foot x ¼-inch nylon-braided high pressure hose ▪ Professional-grade trigger gun ▪ Two-piece, 36-inch lance

### Limited Warranties:
1 year Mi-T-M pump ▪ 1 year Kohler engine ▪ 1 year Mi-T-M engine ▪ Honda engine: 3 month, commercial / 2 year, residential

ChoreMaster® Series
Gasoline – Direct Drive

The multipurpose CM Series is great for keeping patios, siding and equipment clean. Use its built-in detergent injector with a Mi-T-M cleaner to effectively remove mold, mildew and dirt.

Pump:
Equipped with the Mi-T-M Pressure Relief Start which eliminates pressure build-up in the system. Built-in low pressure detergent injector.

Frame:
Powder coated steel frame and base plate with 1¾-inch tube handles. 10-inch flat-free tires.

- 50-foot high pressure hose, with and without quick connects
Work Pro® Series
Gasoline – Direct Drive

Designed to easily handle tough cleaning jobs, the WP Series is great for blasting away mud and muck and is great for cleaning jobs on the farm or small business.

**Pump:**
Equipped with the Mi-T-M Pressure Relief Start which eliminates pressure build-up in the system | Brass manifold | Thermal relief valve | In-line water strainer | Built-in low pressure detergent injector

**Unit Includes:**
Quick connect nozzles - 15°, 25° and detergent nozzle | 25-foot x ¼-inch wire-braided high pressure hose (50-foot on WP-3600 and WP-4200 models) | Professional-grade trigger gun | Two-piece, 36-inch lance

**Frame:**
Powder coated steel frame and base plate with 1¼-inch tube handles | 10-inch flat-free tires

Pump Oil, Foamer, Extension Hoses & Detergents

Finding the right pressure washer accessory for your cleaning task is absolutely essential. Using the wrong nozzle or tip could create adverse results, like damage from too much pressure or ineffective cleaning from too little pressure. There are a variety of different pressure washer accessories to choose from and each will perform a job different from the other. Mi-T-M offers everything from hoses to reels and brushes to wands, just what you need to get the job done right.

Pump Oil
Specially designed for pressure washer pumps. It will keep pumps cooler than with regular oil and is suitable for all climates.
AW-4085-0016
- 1-pint, 6 or 12 per case
- Convenient pour spout and resealable cap
- Contains rust and corrosion additives, anti-wear additives, foam suppressant and dispersant for system cleanliness

Pump Saver
Provides longer pump life, prevents harmful build-up of hard water mineral deposits, preserves seals and pistons and protects against freezing for safe, cold weather storage.
AW-4070-0004
- 16-oz.
- For use with all pressure washers
- Protects pressure washer when not in use

Detergent Foamer
Enhances detergent performance by combining high pressure water, mixed with the detergent and air to produce long lasting thick foam. Prep and presoak surfaces for maximum cleaning.
AW-0018-0459
- 37-oz. capacity
- 1100 to 5000-PSI rated
- 2.0 to 5.3-GPM flow rate
- Adjustable flow control
- 1⁄4-inch quick connect plug inlet
- Long range to reach up to 20-feet

Extension Hoses
For when you need extra mobility and length.
AW-0050-0176
- 23-foot x 5⁄16-inch steel-braided
- 3500-PSI rated, R1
- Fits CV Series, CM-3000-0MMB, WP-2500 and WP-3000 models

AW-0851-0338
- 50-foot x 3⁄8-inch non-marking
- 4000-PSI rated, R1
- Fits CM Gasoline Series and WP Series models 3200-PSI and higher

Detergents
All detergents are hard water stable to prevent spotting. Environmentally friendly, will not harm plants and are biodegradable.

All Purpose Cleaner
AW-4018-0026 / AW-4018-0026-C*
All Purpose Cleaner is the most versatile and efficient all-around cleaner. Use on vehicles, glass, stainless-steel, aluminum, painted surfaces and lawn equipment.
- 1-gallon, 4 per case

Deck & House Wash
AW-4034-0026 / AW-4034-0026-C*
Deck & House Wash removes mildew and dirt. It is recommended for decks, homes and wooden surfaces.
- 1-gallon, 4 per case

Heavy-Duty Degreaser
AW-4059-0026 / AW-4059-0026-C*
Heavy-Duty Degreaser is great for the removal of oil and grease. It is capable of handling all your equipment and automotive cleaning needs.
- 1-gallon, 4 per case

*Available in Canada only.
Nozzles, Pivot Coupler, Water Broom & Gutter Cleaners

Rotating Nozzles
Increase your cleaning power and decrease your cleaning time with rotating nozzles. Offering 0° spray impact with 25° coverage, these nozzles can be used on sidewalks, driveways, track vehicles, muddy areas, old peeling paints and concrete surfaces.

AW-0018-0364
- 2400-PSI rated
- Fits CM-1400 models
AW-7310-0003
- 3000-PSI rated
- 3.0 orifice size
- 212°F temperature rating
- Fits all gasoline pressure washers
AW-7510-Series*
- 5100-PSI rated
- 212°F temperature rating
- Fits CM Gasoline Series and WP Series models
*Consult factory for correct orifice size.

Pivot Coupler
The quick connect pivot coupler adjusts to three different cleaning angles to get those hard-to-reach areas.
50-0208
- ¼-inch quick connect
- Connects between the wand and high pressure nozzle
- Fits all gasoline pressure washers

Water Broom
Water brooms are made from heavy-duty aluminum blocks and casters and are perfect for cleaning decks, garage floors, sidewalks and driveways.

AW-7012-2503
- 12-inch broom with three 65° nozzles
- Quick connect ¼-inch inlet
- Up to 3000-PSI maximum pressure
- Fits CM Gasoline Series and WP Series models

Multi-Function Nozzle
Designed with six high pressure nozzles that are stainless-steel for longer life and durability. Its compact design gives you the convenience of six nozzles in one: 0°, 15°, 25° and 40° plus soap and rinse.

AW-7200-0035
- 3.5 orifice size
- 4200-PSI rated

Gutter Cleaner
Turn your wand into an efficient rain gutter cleaner. Clean your gutters from the ground and blow out dirt, grime, leaves and anything else that may be stuck inside.
50-0201
- 4000-PSI maximum pressure
- ¼-inch quick connect socket outlet
- ¼-inch quick connect plug inlet
Rotary Surface Cleaner
Attaches easily to your pressure washer wand and is very operator friendly. It eliminates over-spraying while reducing water consumption.

**AW-7020-8009**
- 14-inch diameter
- 4200-PSI maximum operating pressure
- Two 25° nozzles
- Underside dual arm
- Quick connects for easy installation
- 180°F maximum temperature
- 8.0-GPM maximum water volume
- Fits all gasoline pressure washers

Extension Wand
Designed to help you clean those hard to reach places.

**50-0180**
- 24-inch extension wand
- Fits all ChoreMaster and Work Pro Series pressure washers

Aluminum Wand Extensions
These lightweight, aluminum extension wands allow the user to clean hard to reach areas with ease.

**AW-7105-3600** (36-inch) | **AW-7105-7200** (72-inch)
**AW-7105-4800** (48-inch) | **AW-7105-9600** (90-inch)
- ¼-inch lance saver socket with quick connect plug
- 4000-PSI rated
- 12.0-GPM flow rate
- 300°F temperature rating
- Fits all ChoreMaster and Work Pro Series pressure washers

Extended Reach Wands
Clean hard to reach places like house siding and eaves, large farm equipment, semi-tractor trailers and multi-story buildings.

**AW-7018-1200** (12-foot) | **AW-7018-1800** (18-foot) | **AW-7018-2400** (24-foot)
- Professional-grade trigger gun with safety lock-off
- Complete with quick connects
- Extends from 6-feet, 8-inches to 12, 18 or 24-feet
- Lightweight and easy to control
- Easy hose retraction
- Can handle water up to 200°F
- Fits CM Gasoline Series and WP Series models 3200-PSI and higher
Selecting The Right Portable Generator For Your Needs

What you should know:

Do Not Undersize the Generator

Undersizing the generator can be avoided by considering all of the loads that will be connected to the generator and determining the starting requirements (motor start) of electric motor-operated devices.

Selecting a Generator

To select an engine-driven generator, you’ll need to determine the power (kilowatt) requirements that must be met under operating conditions. Be sure the generator you select is large enough to handle your present requirements and anticipated needs.

Determining Wattage

Check the nameplate to determine wattage. If wattage is not shown but amps and volts are given, the following simplified formula may be used:

Amperes x Volts = Watts

(Ex. 12.5 Amps x 120 Volts = 1500 Watts)

Determining Kilowatts

To determine kilowatts (kW), use the following formula:

1000 Watts = 1 Kilowatt

(Ex. 1500 Watts/1000 Watts = 1.5 kW)

Inverter Technology vs. Standard Portable Generators

What you should know:

Inverter Technology

Mi-T-M inverters produce commercial quality AC power for sensitive electronic equipment. In addition, Mi-T-M inverter technology offers reduced size, weight, noise and fuel consumption because the generator speed is automatically adjusted to match load conditions. Inverter generators feature a core that uses multiple coils and magnets that produce ac sine waves with each full rotation of the engine. Inverter generators have a three phase process that converts the high frequency ac power to dc power before it inverts it back to clean, stable 120V, 60Hz ac power.

Standard Portable Generators

Mi-T-M’s portable generators are designed to provide the highest power available and are therefore, not recommended to operate sensitive electronic equipment.
Inverters
Gasoline – 2000 & 3000-Watt

Smaller, lighter, quieter and more efficient than conventional generators, the power of a Mi-T-M inverter generator is ultra-clean and can be used to power sensitive electronic equipment like smartphones, tablets, computers and medical devices.

### Alternator:
- Total harmonic distortion (THD) less than 3%
- Copper windings

### Engine:
- Low-oil shutdown
- Recoil start

### Frame:
- Insulated side panels reduce noise
- Easy grip handle integrated into frame (Two handles on GEN-3000-IMM0)
- Rear folding handle and two wheels for easy transport (GEN-3000-IMM0)

### Components:
- DC/battery charging
- USB port for electronics
- Idle control
- USDA/USFS-approved spark arrestors

### Limited Warranties:
- 1 year alternator
- 1 year Mi-T-M engine

### Certification:
- CSA Certified

#### Inverter generator ratings represent no-load sound levels. Noise level tested at seven meters (75% load). Rating represents minimum noise level rating.

Parallel port boxes allow you to utilize the power of two units at once.
ChoreMaster® Series
Gasoline – 3600, 6000 & 8000-Watt

Featuring 3600, 6000 and 8000 watt generators, the ChoreMaster Series comes with a Mi-T-M OHV engine and are designed to provide maximum power for contractors and electrical back-up for power outages.

### Alternator:
- Total harmonic distortion (THD) less than 6%
- Copper and aluminum windings

### Frame:
- Low profile, compact design
- Powder coated wraparound frame with 1-inch steel tubing

### Components:
- Easy-access and protected control panel with magnetic circuit breakers and GFCI-protected receptacles
- Large low tone mufflers
- Engine on/off switch
- Fuel shut-off valve
- DC/battery charging

Limited Warranties:
- 1 year alternator
- 1 year Mi-T-M engine

Certification:
- CSA Certified

Noise level tested at seven meters (75% load). Rating represents minimum noise level rating.

*Dimensions include the wheel kit with the handles in the down position.
Selecting The Right Air Compressor For Your Needs
What you should know:

<table>
<thead>
<tr>
<th>Compressor Size</th>
<th>Air Pressure</th>
<th>CFM vs. PSI</th>
<th>Single Stage or Two Stage</th>
</tr>
</thead>
<tbody>
<tr>
<td>In order to determine what size compressor will meet your requirements you need to establish how it will be used. For example, if you will be using it to power air tools, then you need to determine the CFM (cubic feet per minute) of each tool.</td>
<td>Air pressure is determined by the highest minimum pressure requirement. For example, some tools require more air than others. Tools such as pneumatic nail guns and staplers require smaller amounts of air, while air grinders and sprayers require larger amounts. Most tools have a usage rating for CFM consumption at a recommended PSI (pounds per square inch). This can be found on the tool itself or in the owner’s manual supplied by the tool manufacturer.</td>
<td>CFM refers to a volume of air produced by the air compressor at a given pressure or PSI (pounds per square inch). The right size air compressor will meet your needs in two essential areas: air flow (CFM) and pressure (PSI). It’s important to get a compressor that meets your needs in both areas otherwise you run the risk of damage to both your tools and the compressor itself. Always use CFM and PSI specifications from the nameplate on the product.</td>
<td>On a single stage pump the air is compressed one time and stored in a receiver. A two stage pump compresses the air twice, once in the first cylinder and then a second time in a smaller cylinder which gives you a higher CFM.</td>
</tr>
</tbody>
</table>
Work Pro® Series
Electric or Gasoline – Single Stage – 3, 4 or 5-Gallon

The perfect size for jobs around the house or small workshop. Completely portable, the Work Pro Series delivers great air power for drills, grinders and nail guns. This single stage compressor is built to perform and built to last.

Compressor Pump:
Oil lubricated aluminum crankcase | Copper discharge hose (Electric models) | Stainless-steel braided discharge hose (Gasoline models) | Cartridge air filter

Motor:
Thermal overload motor protection

Frame:
Powder coated tank design | Protective pump/motor housing

Components:
Regulator and two gauges for tank and outlet pressure | Drain and pressure relief valves | Industrial interchange quick connect fittings (Electric models) | Start/stop control set at 95 to 125-PSI

Limited Warranties:
1 year compressor pump | 1 year electric motor | 1 year Mi-T-M engine | 3 year Honda engine

Certification:
CSA Certified - US and Canada (AM1-HE02-04M and AM1-PE02-05M)

Work Pro® Series
Electric or Gasoline – Single or Two Stage – 8-Gallon

The high performing Work Pro Series is offered in an 8-gallon electric or gas-driven air compressor. Available as a single or two-stage compressor it can power everything from nail guns to paint sprayers and staplers.

Compressor Pump:
Splash oil lubricated aluminum crankcase | Stainless-steel braided discharge hose | Oil level sight indicator

Motor:
Thermal overload motor protection

Frame:
8-gallon twin tank receivers | ¾-inch base plate to reduce vibration | 16-gauge powder coated two-piece belt guard | 10-inch flat free tire (Two stage models have two tires)

Components:
Regulator and two gauges for tank and outlet pressure | Drain and pressure relief valves | Industrial interchange quick connect fittings (Electric model) | Quality pilot valve unloader (Gasoline models)

Limited Warranties:
1 year compressor pump | 1 year electric motor | 1 year Mi-T-M engine | 3 year Honda engine

Certification:
CSA Certified - US and Canada (AM1-PE15-08WP)
