

Water Treatment Systems

PWR Series

Mi-T-M Water Treatment Systems provide a better tomorrow by protecting our environment today.

Efficiently recover and filter wash water with a portable water treatment system. The PWR Series Recovery and Recycle System includes a stainless-steel suction head and 20-foot water berm to reclaim wash water for reuse on a job site and can be mounted to a trailer.

PWR Series

Recovery & Recycle System

The PWR Series allows for wash water to be reclaimed on the job site. Water is reclaimed by using the 20-foot water berm (included) to stop water from flowing down a drain or away from your area. The suction head draws wash water into a holding chamber where a second pump forces the water through an optional 10-micron bag filter before returning it to the holding tank for reuse or proper disposal.

Features:

- 1/3 HP transfer pump
- Oil absorbing boom/sock
- Vacuum tank drain
- 3-stage vacuum motor
- Stainless-steel suction head
- Cam lock fittings
- 50-foot vacuum hose
- 55-gallon capacity
- 20-foot water berm
